BUSINESS PROFILE

T3 IT Solutions

Practical technology for growing businesses

AI automation, cloud, cybersecurity, modern collaboration and managed IT support for organizations that want reliable systems and clear guidance.

Serving Chattogram and Cox's Bazar

COMPANY OVERVIEW

Technology support built around your business

T3 IT Solutions helps growing teams use modern technology with less friction and better protection. We connect practical advice with hands-on implementation across cloud tools, security, networks, data protection and day-to-day IT support.

Our focus. We look at how people work, where delays or risks appear, and which technology changes can create a clear operational benefit. Projects can address one immediate need or form part of an ongoing IT improvement plan.

What clients can expect

+ **Business focused.** Recommendations are sized around actual workflows, priorities and resources.
+ **Security conscious.** Identity, access, devices, email and data resilience are treated as core requirements.
+ **Connected thinking.** Cloud tools, devices, networks, backups and support are planned as one working environment.
+ **Local and responsive.** Support is available through offices in Chattogram and Cox's Bazar.

Leadership

Abdullah Al Mahamud
Proprietor, T3 IT Solutions

T3 IT Solutions works directly with clients to understand operational needs, agree a realistic scope and keep communication clear through implementation and support.

SERVICES

Modern tools that move work forward

Choose a focused project or ongoing support. Each service is designed to improve productivity, reduce avoidable risk and make technology easier to manage.

AI and Workflow Automation

Identify repetitive tasks, assess useful AI tools and build simple workflows with clear review points and human handoffs.

Cloud Migration and Optimization

Plan moves for files and business applications, organize access and review cloud usage and costs as needs change.

Cybersecurity and Threat Protection

Review risks, strengthen devices and email, coordinate updates and help teams recognize phishing and common threats.

Identity and Access Security

Set up multifactor authentication, practical permissions and secure onboarding and offboarding for staff.

Modern Workplace and Collaboration

Get more from Microsoft 365 or Google Workspace through email migration, secure sharing and organized team workflows.

SERVICES

Resilient systems and dependable support

Reliable operations depend on preparation, visibility and timely support. These services help keep systems available, protected and ready to grow.

Backup and Disaster Recovery

Protect important data with planned backups, offsite copies, restore tests and a practical recovery plan.

Managed IT and Proactive Support

Keep devices and services organized with routine health checks, updates, remote help and an IT improvement roadmap.

Secure Networks and Hybrid Work

Improve business Wi-Fi, firewall settings and remote access so teams can connect safely across locations.

Data Dashboards and Reporting

Bring important business numbers into clear dashboards and automate routine reports for faster decisions.

Ways to engage

+ **Focused project.** Address a defined need such as a migration, security improvement, backup plan or workflow automation.

+ **Ongoing support.** Maintain systems, assist users and improve the IT environment as the business changes.

HOW WE WORK

Clear goals and practical progress

Every engagement starts with the business need. We agree what success should look like, implement in manageable steps and keep the handover clear.

01 Share your goal

Tell us what you want to improve, the tools you use and what is slowing your team down.

02 We assess

We review the current setup, priorities and risks, then agree on a realistic scope.

03 We implement

We set up the solution, check it with your team and make the handover clear.

04 We improve

For ongoing clients, we help maintain systems and adapt them as the business changes.

Why T3 IT Solutions

+ **Practical recommendations.** Technology choices are connected to an operational goal and explained in clear language.

+ **One partner across systems.** Cloud, identity, networks, backups, devices and support can be planned together.

+ **Local presence.** Clients can reach the team through offices in Chattogram and Cox's Bazar.

LOCATIONS AND CONTACT

Start a conversation about your next improvement

Share your current challenge, planned project or support requirement. T3 IT Solutions will review the need and prepare the details for a practical discussion.
